EXAMINER

TAWFIK, SAMEH

ART UNIT

PAPER NUMBER

3721

DATE MAILED: 11/09/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/813,517	Applicant(s) FRANKLIN ET AL.	
	Examiner Sameh H. Tawfik	Art Unit 3721	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-44 is/are pending in the application.
- 4a) Of the above claim(s) 30-44 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-23 and 25-29 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I (claims 1-29) in the reply filed on 09/30/2004 is acknowledged.

Information Disclosure Statement

The information disclosure statement filed 03/30/2004 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 7-14-20, 23, and 25-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Westphal et al. (4,739,910).

Westphal discloses a method and an apparatus of tucking a pair of opposing side panels onto a body portion of a pant-like garment comprising the steps of positioning the body portion of the pant-like garment on a conveyor having a vacuum zone (Fig. 1; upper and lower conveyors and via vacuum sources 122); holding the body portion on the conveyor using vacuum force from the vacuum zone (Fig. 2; via the body of the garments 12); and pushing the opposing

Art Unit: 3721

side panels onto the body portion a distance toward one another, creating longitudinal folds in the garment along outer longitudinal edges of the vacuum zone (Figs. 10-12 and column 7, lines 65-68).

Regarding claims 2, 3, 15, and 16: wherein the vacuum zone comprises an outer area adjacent each of the outer longitudinal edges, the outer areas each having a first vacuum, and an inner area between the outer areas, the inner area having a second vacuum lower/higher than the first vacuum (Fig. 2; via vacuum compartments 128, 130, and 132; and column 5, lines 51-62).

Regarding claims 4 and 17: wherein the vacuum zone comprises a uniform vacuum across a transverse width of the vacuum zone (Fig. 1; via across the transverse of each compartment same vacuum source).

Regarding claims 5 and 18: wherein the vacuum zone has a transverse width about equal to a desired folded transverse width of the body portion of the garment (Figs. 1 and 2; via vacuum conveyors).

Regarding claim 7: further comprising the step of using a mechanical tucking device to push the opposing side panels onto the body portion toward one another (Figs. 10-12).

Regarding claim 8: wherein the longitudinal folds are created in the body portion of the pant-like garment (Figs. 9 and 12).

Regarding claim 9: wherein the longitudinal folds are created along seams joining the side panels to the body portion (Figs. 8 and 9; via seams 20 and 22).

Regarding claim 10: wherein a portion of at least two of the opposing side panels is held onto the vacuum zone, and a longitudinal fold is created in each of the at least two opposing side panels (Figs. 2, 10, and 12; column 7, lines 65-68).

Art Unit: 3721

Regarding claim 11: wherein the pant-like garment comprises a training pant (Fig. 9).

Regarding claim 12: wherein the pant-like garment comprises a swim pant (Fig. 9).

Regarding claim 13: wherein the pant-like garment has un-bonded side panels (Fig. 9).

Regarding claim 19: an upper conveyor having an upper vacuum zone and a lower conveyor having a lower vacuum zone (Figs. 1 and 2; via 122).

Regarding claim 20: wherein the upper conveyor and the lower conveyor diverge from one another and then converge toward one another along a machine direction path of the conveyor (Figs. 1 and 2).

Regarding claim 23: wherein the device for pushing the side panels onto the body portion comprises a vacuum (Fig. 2; via vacuum conveyor belts help on the folding step; column 7, lines 65-68).

Regarding claim 25: wherein the device for pushing the side panels onto the body portion comprises two opposing assemblies, each assembly including at least one tucking blade on a track that guides the at least one tucking blade a distance alongside the at least one conveyor (Fig. 10; via blade 176).

Regarding claim 26: wherein the track of each of the assemblies maintains the at least one tucking blade essentially parallel to the pant-like garment (Figs. 10-12).

Regarding claim 27: wherein the track of each of the assemblies travels essentially parallel to the at least one conveyor and above the at least one conveyor (Figs. 1 and 2; via above conveyor 74).

Art Unit: 3721

Regarding claim 28: wherein the track of each of the assemblies travels essentially parallel to the at least one conveyor and below the at least one conveyor (Figs. 1 and 2; via below conveyor 96).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over Westphal et al. (4,739,910).

Westphal does not disclose that a driven stacker assembly having at least two stacker finger units. However, the examiner takes an official notice that the mentioned driven stacker assembly having at least two stacker finger units is old, well known, and available in the art to stack group of products. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Westphal's apparatus by having driven stacker assembly having at least two stacker finger units, in order to stack group of products as they come out of the apparatus.

Claims 6, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Westphal et al. (4,739,910) in view of Kober (5,300,007).

Art Unit: 3721

Westphal does not disclose the step of using a pair of fluid streams to push the opposing side panels onto the body portion toward one another. However, Kober discloses using a fluid streams for folding a segment (Figs. 1-3) to simply control the folding proces.

Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have substituted Westphal's folding pusher and arms as shown in Figs. 10-12 by using fluid streams, as suggested by Kober, in order to use less mechanical parts and as a result occupying a minimum of valuable floor space (column 2, lines 8-10).

Allowable Subject Matter

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sameh H. Tawfik whose telephone number is (703) 308-2809. The examiner can normally be reached on Tuesday - Friday from 8:00 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi Rada can be reached on (703) 308-2187. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Art Unit: 3721

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Sameh H. Tawfik
Patent Examiner
Art Unit 3721

A handwritten signature in black ink, consisting of a large, stylized 'S' followed by a long horizontal stroke that curves upwards at the end.
